RESEARCH AND TEACHING INTERESTS

My major research interests are studying the water cycle within the coupled human and natural system at varying temporal and spatial scales using both data mining (big data) and case study (small data) approaches. Since joining the faculty in 2020, I designed, built, and direct the Syracuse University Hydrogeochemistry And eNvironmental Data Sciences (HANDS) Research Laboratory. Concentrations of water quality parameters and isotopic compositions of selected elements (e.g., oxygen, hydrogen, carbon, nitrogen) are determined by ion chromatography, optical emission spectrometry, mass spectrometry, and water isotope analyzer. In addition, the emerging machine learning and geostatistical tools are developed and utilized to assess the interplay between water and carbon cycles in Earth-Surface systems, as well as to investigate the regulation of these cycles by human activities (e.g., energy extraction and urbanization) and natural processes. I teach a variety of water-related courses for both undergraduate and graduate students including Water and Our Environment (EAR 205), Hydrogeology (EAR 401/601), and Environmental Aqueous Geochemistry (EAR 419/619).

TEACHING

EAR 205 – Water and Our Environment, Syracuse University *Spring 2021*

- This course covers the origin, occurrence, chemistry, and hydrology of water on earth. Class topics include climate change, contamination, and water supply issues within context of water sustainability.

EAR 401/601 – Hydrogeology, Syracuse University *Fall 2020*

- This course covers the fundamentals of groundwater hydrology and hydraulics.

GEO SC/ GEOG 497 – Data Mining in Environ. Sci., Penn State University *Fall 2019*

- Applying both conventional and emerging data analytics tools to studying problems in the environmental sciences through mini-lectures and hands-on projects

Co-teaching GEO SC 560 – Kinetics, Penn State University *Spring 2019*

- Using data-driven models to assess the impact of natural and anthropogenic features on weathering rate on a watershed scale

Workshop Instructor in Shale Network Workshop, Penn State University *May 2018*

- Computer module demonstration and hands-on exercise: Created and prepared learning material; taught water chemistry about Marcellus-related spills for over 40 participants.
- Field trip to mock spill event: Assisted in organizing the field trip to mock spill.

Interim Instructor, Penn State University *April 2017*

- GEOSC 560 – Kinetics of Geological Processes: Taught basics of isotope geochemistry.

Teaching Assistant, University of Michigan *September 2013 – December 2016*

- EARTH 100s – Multiple introduction classes of earth sciences.
- EARTH 477 – Hydrogeology: Guided 50+ students to understand the fate and transport of contaminants from Underground Storage Tanks via hands-on hydrogeological lab work and the interpretation of stratigraphic information.
- EARTH 408 – Introduction to GIS in the Earth Sciences: Taught 24 students to implement 2D & 3D spatial analysis in ArcGIS; received positive teaching evaluation (**rated at 4.5-5.0 out of 5.0**) from students and teachers.
